REQUIREMENT RR/HTA/E/R14/57: Describe changes since World War II  
in the Radviliskis Railroad Yards and Shops.

## REMARKS:

The Radviliskis Railroad Yards and Shops, located 63 miles north-northwest of Kaunas on the Vilnius-Siauliai rail line, functions primarily as a relay and classification point.

A comparison of [ ] photography with that of World War II reveals that the roundhouse located in the center of the yard has been removed. There is also a possible maintenance or repair area under construction at the southeast end of the installation. It contains two partially completed buildings, one 300 by 70 feet and another 200 by 80 feet. Both buildings have openings at the ends large enough to admit rolling stock.
